

Don't Walk in the Halls!

Dear Parents,

We are up and running with our Don't Walk in the Halls program! This program promotes physical literacy by using decals throughout the hallways to change how we move during our day. The decals will begin to start showing up this week in different areas of the school. Students have worked to pre-plan patterns and ideas for the sections. Watch for information too as to how we are moving on them at different times (again this will be planned by the students). The decals are heavy duty and will stay in place until June, when they will be removed for summer floor maintenance. Please ensure your little ones are not picking or peeling them as they will lose their adhesiveness!

The students will be spending some time with their classroom teachers discussing how to use them appropriately and how they can use them in many ways.

- learning patterns
- shapes & colors
- gross motor skills
- following directions
- literacy & numeracy games
- story building
- increasing physical activity in the day
- brain breaks or movement breaks

We look forward to launching this awesome physical literacy program and hope to see you trying them out with your child!
